1.1 Lutfiyya Razak

Interests

I am interested in how systems work and how it is developed. I like to learn new technologies. I also have a great interest in web development because of all the exciting things a person can do with the few languages that they know. Another interesting topic is computer security mainly security treats and how it is dealt with. Human-computer interaction is another very interesting concept because it deals with how users interaction with a computer or a system.

Technical skills

Skills	Languages	Proficiency
Software	C, C++, Java, C#	Good
Web development	HTML 5, CSS 3, PHP, Jquery, XML, Javascript, JSON, AJAX	Advanced
Database Systems	Access, SQL Server, MySQL, PostgreSQL	Advanced
Design	UML	Good
Documentation	Microsoft Office, Open Office, LaTeX	Advanced
Version Control	Git	Good

Non-technical skills

Good interpersonal skills and I am able to resolve conflict. I have good observational skills therefore i notice detail which most people tend to miss. I am able to learn new concepts in a short span of time.

Past experiences

None

What makes me want to do the project

I like a challenge and also enjoy learning new concepts often which include new technologies.

2 Project execution

2.1 Development methodology

2.2 ideas

2.3 technologies

2.4 Client informed

2.5 client receive at end of project
